DoctorWeb

The complete clinic management panel with a website you can manage yourself.

- ✓ Patient records
- ✓ Consultations & prescriptions
- ✓ Staff management
- ✓ Roles & permissions
- ✓ Appointments & queue
- ✓ Billing & receipts
- ✓ Reports & CSV export
- ✓ Public clinic website

Run your whole clinic from one place

From the first appointment to the final payment, every step is recorded, searchable and printable.

1 Dashboard

- Today’s schedule and open appointments at a glance
- Follow-ups that still need to be arranged
- Quick links to every area the logged-in user is allowed to use

2 Patient management

- Register patients: personal details, date of birth, gender, blood group, address, email, phone and emergency contact
- Record allergies, medical history and notes
- Full patient profile with a medical summary and visit history
- Upload lab reports and scans (PDF or image, up to 10 MB), then view or print them
- Book appointments, start consultations and create invoices straight from the patient file

3 Appointments

- Day-wise schedule with a waiting queue
- Book, edit, reschedule and cancel, with a visit type and length in minutes
- Check in, mark No show, and open the consultation directly from the appointment
- Register a new patient while booking
- Online booking section on the public website

4 Consultations & prescriptions

- Chief complaint, history, vitals, examination, diagnosis and advised tests
- Prescription with medicine, dosage, frequency, duration and instructions
- Follow-up date, advice and treatment notes; save as draft, finalise, reopen to edit
- Previous visits visible while consulting
- Print the prescription with your own header and footer text
- Specialty fields: add custom fields for any specialty

Billing, staff and reports

5 Billing & payments

- Invoices with line items, quantity, price and discount
- Create an invoice directly from a consultation
- Full or part payments by cash, UPI, card or cheque, with a reference number
- Print invoices and payment receipts; cancel invoices; track the amount due
- Custom invoice number prefix, currency symbol and footer text

6 Staff management

- Staff profiles for roles such as nurse and receptionist
- Attendance, shifts and daily tasks, including tasks tied to a specific patient
- Assign patients to staff members
- Record salary and other staff payments

7 Reports (each downloadable as CSV)

- Patients
- Appointments (completed, cancelled, no show)
- Consultations (most common diagnosis)
- Treatments & medicines prescribed
- Revenue (billed vs collected)
- Pending payments (days overdue)

8 Roles, permissions & security

- Ready-made roles: **Super Admin, Doctor, Receptionist, Nurse**
- Create your own roles and choose exactly what each can see and do; billing, medical records and reports are separate permissions
- Add and manage admin users
- Login protection against repeated wrong attempts
- Own profile and password page for every user

9 Clinic settings

- Clinic profile, specializations, staff roles and specialty fields
- Billing and printing options

Your clinic website, managed without coding

10 Public website

Everything below is edited from the same admin panel, with no developer needed.

- Homepage slider and intro section
- “Why choose us” and info strip
- Doctor profile and doctor card
- Services, treatments and symptoms pages
- About page and contact page
- Appointment booking section
- Health tips blog
- FAQs
- Patient reviews and associates
- Photo gallery and video gallery
- Enquiry form: stored in the panel and emailed to the clinic
- Site settings for branding and details

Built on proven technology

Laravel 12 | Livewire 4 | Tailwind CSS | Role-based access | MySQL | Print-ready documents

Ready to see it in action?

Ask for a live demo with sample patients, appointments and invoices. We can tailor specialty fields, invoice text and the public website to your clinic.
